SUMMARY

Python Django Developer with 2 years of experience in designing, developing, and maintaining robust web applications and RESTful APIs. Proven expertise in the Django framework, PostgreSQL, and front-end integration using React. Passionate about building scalable, secure, and high-performance solutions. Experienced in Agile methodologies, cloud deployment, and containerization with Docker.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3
Frameworks / Libraries: Django, Django REST Framework, FastAPI, React
Cloud & DevOps: AWS (EC2, RDS), Docker, CI/CD, Git, GitHub
Tools & Technologies: RESTful APIs, OpenCV, FFmpeg, Agile/Scrum
Databases & ORM: PostgreSQL, MySQL, Django ORM

EXPERIENCE

Software Developer - Blossoms Aroma Private Limited.

June 2025 - Present

- Designed, developed, and maintained a full-scale chemical inventory management web application using Django to streamline operations for Admin, Lab Staff, Production, and Accounts teams.
- Architected and implemented the backend, featuring secure RESTful APIs for inventory tracking, formulation assignment for the production team, and a dynamic OTP-based authentication system to secure user access.
- Implemented robust security and data protection measures through a granular role-based access control (RBAC) system. This enforced specific permissions and data visibility for each role.
- Optimized application performance and scalability by designing an efficient data model with Django ORM and PostgreSQL, ensuring fast query execution for complex inventory searches and reporting across all user roles.
- Containerized the application using Docker for consistent development and deployment environments, and implemented basic CI/CD pipelines for automated testing and deployment.
- Troubleshoot and debugged production issues, reducing system downtime by 30% through proactive monitoring and performance optimization.
- Created comprehensive technical documentation for API endpoints, system architecture, and deployment procedures.

Python Developer - Brillfy technology Inc.

May 2024 - June 2025

- Developed and maintained client-focused web applications using Python and the Django framework within an Agile/Scrum team environment, participating in daily stand-ups and sprint planning.
- Architected and built a complete Video Management System backend, integrating real-time IP camera feeds via RESTful APIs using OpenCV and FFmpeg.
- Engineered Django API modules for managing encrypted video recording, playback, and access control, showcasing strong skills in web application architecture.
- Deployed applications to AWS cloud infrastructure, configuring EC2 instances and RDS databases for optimal performance and scalability.
- Participated in code reviews, providing and incorporating constructive feedback to maintain high code quality standards and comprehensive documentation.

PROJECTS

Video Management Software

- Backend: Python, Django, Django ORM, PostgreSQL, OpenCV, FFmpeg, Docker, AWS
- Designed and developed secure RESTful APIs for live streaming, recording, and encrypted video playback, optimizing for performance and scalability.
- Implemented security measures including AES-256 encryption, JWT authentication, and user role-based access control.
- Containerized the application using Docker and deployed on AWS EC2, implementing monitoring and troubleshooting procedures for production environment.
- Integrated with third-party IP camera APIs (e.g., Hikvision) to manage and stream real-time feeds.

Best Price Dekho – Price Comparison Platform

- Full-Stack: Django, Django REST Framework, PostgreSQL, React, JavaScript, HTML5, CSS3
- Engineered a full-stack web application using Django for the backend and React for the frontend to aggregate and display real-time product data.
- Developed and maintained REST APIs in Django to serve pricing data, which were consumed by the React frontend for dynamic filtering and comparisons.
- Optimized frontend performance through lazy loading and efficient state management, improving page load times by 40%.

EDUCATION

GLA University, Mathura

2024

MCA - Master of Computer Applications

Mathura, Uttar Pradesh

CERTIFICATIONS

Python Programming – [Udemy]
